5. Fast implementation
6. Reduces costs and increases efficiency
7. Bilingual: English and Spanish

Justice 360[®]

Case Management Platform

JUSTICE 360[®] is a web-based case management platform designed to expedite judicial processes in a centralized manner. It enables courts to manage electronic records for all legal cases filed, for civil, criminal and other related matters from filing to sentencing and beyond.

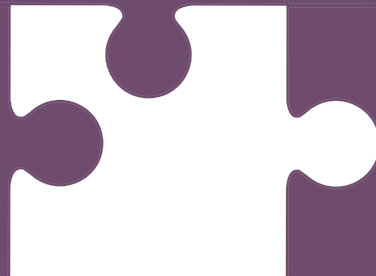

Some of the main features available within our platform include:

- Provides online access to court case records.
- Clerks, court staff and judges may search and update case records according to their role.
- Customized workflow configurations.
- Provides a wide range of configurable system alerts, automated notifications, and process staging.
- Provides a unique attorney and prosecutor registry.
- Presents a smart dashboard to monitor court performance indicators.

JUSTICE 360® Components

Case Management Platform

JUSTICE 360® may be purchased and implemented as a fully integrated case management solution or as stand-alone components. This model grants your court flexibility to choose according to your court's needs and preferred pace for implementation.

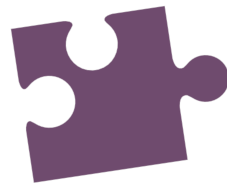

E-Filing Portal

- Enable attorneys to access present legal filings electronically to courts.
- Allow authorized citizens to access public court case information electronically.
- Access case dockets & documents.

Analytics Dashboard

- Performance measurement tool that presents a dashboard with graphs and charts.
- Customizable according to system user role.
- Export data for processing and generation of ad-hoc statistical reporting.

Case Processing Modules

- Clerks and judges can register and process case information according to their role.
- Facilitates collaboration between court personnel and judges throughout the case lifecycle.
- Provides calendar & schedule of all court events.

E-Notice

- Allows sending of court notifications and summons via email. Also, generate forms and case documentation to be printed and sent by general correspondence.
- It gives visibility of official notifications date.

Document Uploading

- Stores content in a central repository.
- Helpful management features of a document library are available, such as metadata, content types, and unique IDs. Media asset libraries offer thumbnail views of images and video.

Fairness Center®

Legal Financial Obligations

Fairness Center® is an online court service for citizens that have difficulties complying with their court-ordered legal financial obligations, such as fines and fees. Through this service, the court evaluate the person's financial situations and register the corresponding determination for each request.

Our ability-to-pay calculator provides judges with an automated recommendation based on predefined input, which may be accepted or overridden in their determination.

Some of the main features & benefits available within our platform include:

- Allows defendant to easily submit a request online
- Applies a uniform criteria
- Provides the court with a suggested sanction
- Helps connect people with the court
- Helps reduce incarcerations due to inability to pay, which saves the court time and costs

Fairness Center® Components

Legal Financial Obligations

Fairness Center® may be seamlessly integrated into our JUSTICE 360® Case Management Platform. It may also be integrated with your existing CMS and other IT components, helping you capitalize on previous IT investments while still modernizing and reducing duplicity of work and data segregation.

Defendant's Portal

- Allows defendant to:
 - Submit requests online, including supporting documentation
 - Confirm request status
 - Payment statements – Make electronic payment
 - Upload documents

Rules Engine

- Receive defendant input via portal
- Ability-to-Pay calculator
- Court Configurations of alerts and notifications

Request Management

- Clerks & Judges may access and manage each request presented by a defendant
- Admin Module presents recommendation to judge regarding alternative sanction requested
- Judge submits final determination
- System alerts regarding notifications and updates made to request case
- Register compliance with alternative sanction – Community Service hours
- Electronic notification of court determination and orders

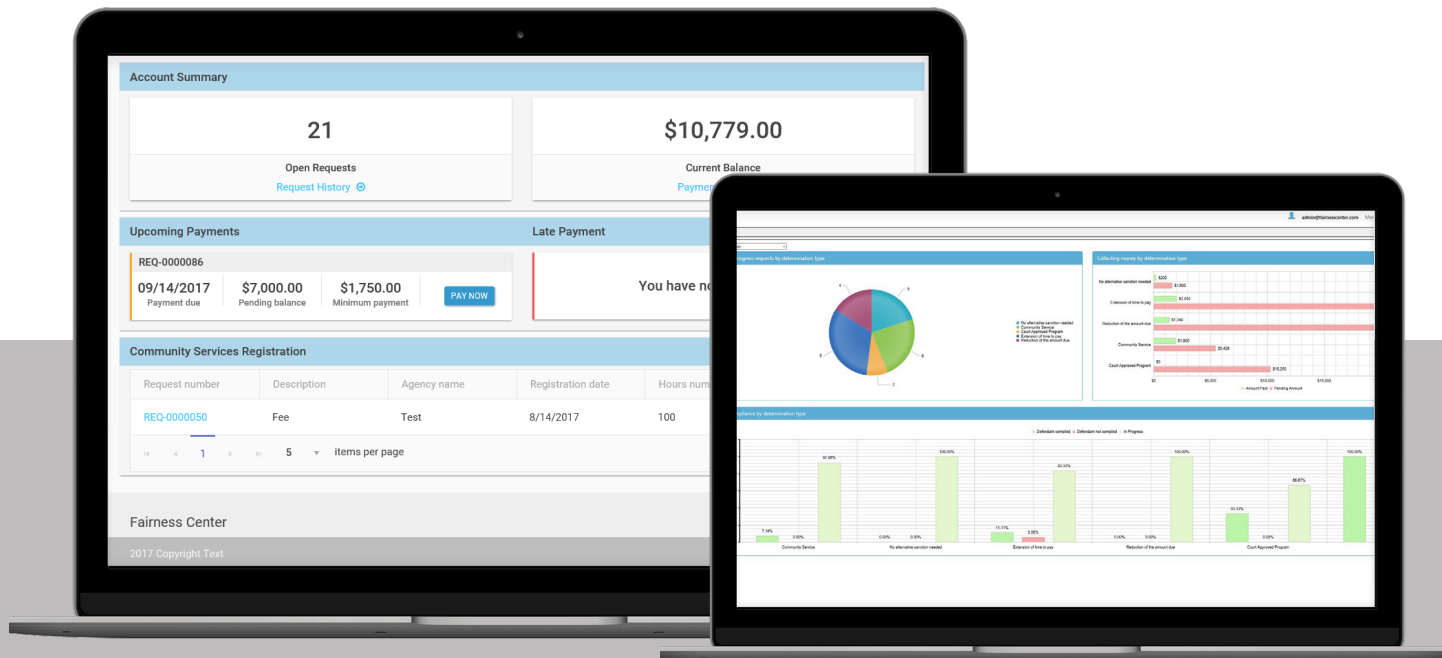

Dashboard

- Visual tool that presents performance measurement results to monitor general court performance and support decision-making efforts.
- Monitor requests presented by type of sanction, “Collections” and “Compliance” metrics based on final court determinations.
- Export data for processing and ad-hoc statistical reporting
